## TOOLS

Tools for the production of injection-moulded parts

### Description:

We make tools at your needs and produce specific tools exactly according to your measures, as well as the parts of technical injections.

## The aluminium profiles

### The profiles of aluminum, Aluexpo System Metroline

#### Description:

With more than 30 years experience in the field of fair stand construction, our exhibition system with aluminium as connecting technique has already been widely tried and tested.

The flexible possibilities of application allow a simple, actual assembly and facilitate the transport.

Simple design of high quality, proven material quality (optionally aluminum anodized or thermo-lacquered in 150 RAL colors ), as well as the high stability and the important life expectancy are the characteristics which make of our product a perfect solution.

Our system allows surges free of support up to 10 meters. Mounted towers, light bridges, hangable ceiling elements up to 4.00-m length, wall elements free of joints offer vast creative possibilities.

And our innovative modular system in the field of the exhibitions and of the arrangement has proved its efficiency.
